

UNIFIED SMART IP STORAGE SYSTEM

The Unified Smart IP Storage System, that includes RELDATA's 9200 IP Storage Gateway and Nexsan's SATABoy storage array, offers an unrivalled price/performance ratio with top quality hardware, high availability features and all-inclusive software functionality. It paves the way for highly cost-effective enterprise-wide unified IP storage and disaster recovery solutions, which provide exceptionally high value for organizations with the following IT challenges:

- ⇒ Fast-growing, mixed file and block storage volumes;
- ⇒ Enterprise-wide file sharing based on open storage clustering;
- ⇒ Consolidation of a distributed storage infrastructure;
- ⇒ Data center disaster recovery planning;
- ⇒ Data protection and availability policy involving multiple locations;
- ⇒ Transaction protection with narrow data recovery point and time objectives;
- ⇒ Leveraging existing under-utilized Fibre Channel SAN resources.

The Unified Smart IP Storage System is an open storage virtualization system that delivers both iSCSI SAN and NAS file storage, together with a comprehensive set of IP-based disaster recovery and backup features based on high-speed storage.

Components included*:

- 1 x RELDATA IP Storage Gateway 9200,
 - Dual 3 GHz Intel processors,
 - 6 x 1 Gb Ethernet ports,
 - 2 x 2 Gb FC ports,
 - 2 x Ultra320 SCSI ports,
 - 1 x rack-mount kit,
 - Dual, hot swap power supply,
 - ALL SOFTWARE FEATURES INCLUDED!**
 - 3 years factory warranty.
- 1 x Nexsan SATABoy,
 - Dual 2Gb Fibre ports per controller,
 - Single iSCSI port,
 - Single controller,
 - 14 Bay / 3U,
 - 14 x 500 Gb, 7.2K, SATA2 Disk, (7 TB raw capacity),
 - 512MB Cache (Expandable to 2GB),
 - RAID Levels 0, 1, 1+0, 4, 5 and 6,
 - Dual PSU - 400W / 286VA,
 - Fully redundant – Load sharing,
 - 3 years factory warranty.

"RELDATA was able to offer an extremely versatile and highly configurable solution at an attractive price. Other solutions would not have given us the power to build such a highly fault tolerant SAN. Their offering was more than just a product; it was also the people behind the product and the knowledge that came with them."

Jay Vocaire, System Administrator, Innovative Process Administration, LLC.
