

NEXSAN BEAST P

**EVERYTHING
YOU NEED
AND NOTHING
YOU DON'T**

NOTHING ELSE DOES MORE FOR LESS

Lower storage costs and get maximum uptime with BEAST Performance Series (BEAST P). It's your practical and hard-working storage platform.

Nexsan storage is built for IT people who care about getting the job done right with the right storage. Our 25-year history of reliable, economical storage fits the bill for specific business requirements that keep tighter budgets at the top of mind. BEAST P's highly reliable storage platform is budget-friendly and an excellent fit for enormous data growth applications like backup, archive, digital video surveillance, and more.

STRESS-FREE STORAGE

There are plenty of things to worry about every day and one of them should not be your storage. Our customers are known to say, "You just set it and forget it." From installation to the single GUI management for multiple systems, BEAST P is just that simple.

Nexsan's proven track record of enterprise reliability is thanks to our extensive stress testing of both drives and systems prior to shipping. BEAST P keeps your data highly available with dual redundant, hot-swappable components, multipathing, and an intelligent battery-backed and mirrored flash cache of 16GB per controller. SNMP Alerts or email notifications are sent to the administrator in the event of a component failure, and a spare drive is automatically rebuilt into the RAID set in case of disk failure.

WE FIT IN TIGHT SPOTS

BEAST P lets you get back your rack when space is tight, designed for 60 drives in 4U of a standard rack. That's up to 1.2PB of capacity in 4U and up to a total of 3.6PB in a fully-scaled 12U configuration.

WE RUN WHERE OTHERS DON'T

Our systems are built to withstand some pretty tough storage environments outside the data center like ships, subway stations, and storage closets that have less than ideal temperatures and vibration. Nexsan leverages an innovative design with Cool-Drive Technology™ and Anti-Vibration Design to significantly reduce heat and vibration in the unit.

SAVE ENERGY, SAVE CASH

Nexsan AutoMAID® makes it easy to go green without sacrificing performance when needed by choosing your energy savings with the easy-to-use management interface. You can reduce power consumption by up to 87 percent to lower operating expenses plus extend the life of the system.
